Prototype V1

- **Data scraping and cleaning** complete (using real world datasets, do not use R built-in data)

- At least **one visualization already implemented**, and draft for 2-3 more visualizations

- If choosing R shiny app, **rough webpage design and structure** has to be done and implemented (placeholders for visualizations)

- If choosing the other two options, **clear outline and storytelling flow** of the visualizations

- A **README.md** file in your GitHub repo that describes your project, how to view it, and any dependencies
